Att.: Erdal KAYA

Decision on revision of certificate of FPC under CPR with number 2392 – CPR – 1321

Based on your request received via Kiwa Turkey we have established your certificate with a list of the chimneys covered:

METAL CHIMNEYS, according to schedule page 2 of the certificate

Based on our notification with number 2392 Kiwa Sverige has issued a certificate of FPC after an evaluation of the factory control system with the implementation in your production.

The evaluation is made according to the harmonized European Standard:

**EN 1856-1:2009 Chimneys – Requirements for metal chimneys –
Part 1: System Chimney Products part 10.3 Factory production control (FPC) +**

The certificate of FPC is valid for the production of the product with the extents as described in the certificate and in the inspection report.

Any substantial changes of the products, changes in production or changes in the documented system for FPC shall immediately be reported to KIWA for evaluation - otherwise the certificate of FPC may lose its validity.

Any comments or complaints regarding the approved products as well as details of corrective actions must be kept in an easily accessible manner and be presented in connection with the annual external inspection. The holder is responsible for that current factory production control is carried out, reported and filed.

The validity of the certificates is also depending on that the rules for issuing certificates for FPC is not changed in a substantial degree.

This case has been dealt with by Mr. Johnny Ostfeldt at Kiwa Sverige.
The inspection of the FPC has been made by Kiwa Turkey.
